

GlycoAla® Bio: Where Holistic Regeneration Meets European BioInnovation

Holistic Regeneration Backed by Biomodulation Science

GlycoAla® Bio is the world's first cosmetic biomodulation gel designed to elevate your skin's natural renewal process—without needles, trauma, or downtime. Using a biological micro-channelling system powered by Spongilla spicules, this treatment stimulates collagen, improves texture, and reveals a radiant glow.

What Makes GlycoAla® Bio Different

- 100% needle-free and non-metallic
 - No bleeding, trauma, or discomfort
 - Uses natural Spongilla spicules (microscopic freshwater structures)
 - Stimulates collagen, elastin, and hyaluronic acid production
 - Contains 11 synergistic active ingredients, sourced in Europe
 - Elegant hydrogel base enhances penetration and skin compatibility
 - Safe for all skin types, with minimal downtime
-

Key Benefits

- Repairs and regenerates the skin barrier
 - Reduces fine lines, wrinkles, and signs of aging
 - Brightens dull, uneven skin tone
 - Refines skin texture and minimizes pores
 - Boosts hydration, firmness, and elasticity
 - Detoxifies and revitalizes skin for a healthy glow
-

How It Works

GlycoAla® Bio uses Spongilla spicules—natural, microscopic freshwater needles—that penetrate the skin gently and remain active for up to 72 hours. These spicules stimulate natural cell turnover and collagen production, while enhancing the absorption of powerful skin-rejuvenating actives.

This system is supported by 11 clinically backed ingredients formulated by a plastic surgeon and a European team of expert bio-chemists.

The Power of 11 Synergistic Actives

- Laminaria Digitata Extract
 - Fucus Vesiculosus Extract
 - Magnesium Ascorbyl Phosphate (MAP)
 - Gluconolactone
 - Bakuchiol
 - Spirulina Maxima Extract
 - Rosa Canina Extract
 - Alpha Arbutin
 - Niacinamide
 - Porphyra Umbilicalis Extract
 - Ascophyllum Nodosum Extract
-

Targeted Skin Solutions

Regeneration & Repair

- Accelerates cellular turnover
- Promotes collagen and elastin synthesis
- Shortens skin cycle from 28 to 7 days

Purification & Detoxification

- Clears dead skin cells
- Unclogs pores
- Regulates sebum to prevent breakouts

Hydration & Anti-Aging

- Revitalizes dull skin
- Improves product absorption up to 100x
- Enhances elasticity and hydration

Pigmentation & Radiance

- Fades dark spots and hyperpigmentation
- Brightens skin tone

Protection & Defense

- Strong antioxidant protection
- Neutralizes free radicals and oxidative stress

What to Expect

Treatments are quick, gentle, and non-invasive. Some clients may experience mild redness or dryness for 24–48 hours. Visible improvements in tone, texture, and hydration can often be seen after just one session.

Common Questions

Is it painful?

No. GlycoAla® Bio is a gentle, non-metal treatment designed for comfort.

How much downtime is there?

Very little. Most clients resume normal activities the same day or within 24–48 hours.

How many sessions will I need?

Many see visible improvements after just one treatment. We will personalize a treatment plan based on your goals.
